

Abrasives In Action

From The Abrasive Solutions Company

Garryson MX

Cotton fibre reinforced abrasive mounted points

Specifically designed for deburring on precision-machined components that require light deburring in their final finishing process. Where dimensional accuracy and surface finish are critical.

Application

Light / medium de-burring of precision-machined parts requires accuracy and control to avoid altering the critical dimensions of the components. Garryson MX cotton fibre reinforced abrasive mounted points are ideal for de-burring operations. The controlled grinding and smooth running result in an exceptionally fine surface finish. Garryson MX mounted points can be used in a wide range of industries such as aerospace and die & mould....
