

# Abrasives In Action

From The Abrasive Solutions Company

## Minidisc

### In the Automotive Aftermarket

Minidisc is a 'Small Convenient Quick Change Solution'

### Application

Garryson Minidisc is a quickchange disc with all the features and benefits of a flapdisc – consistent performance, grind and finish in one operation, and long life. Minidisc is the perfect product for use in panel replacement in the automotive aftermarket. When used on a suitable right angle die grinder, Minidisc will rapidly clean all the flange surfaces in preparation for plug / spot welding a new replacement panel in position. Minidisc outlasts conventional coated abrasives quick-change discs up to 15 times, and it incorporates a robust, rigid backing plate to provide edge strength and eliminate excessive “mushrooming” and wear of the holder.

Flanges (Rear Boot)  
Cleaning all flange surfaces

Rear Boot Aperture - Dressing 'plug' welds

### TIP

When using minidisc, always use the appropriate machine tool operated at the correct speed.

Eg Georges Renault right angled die grinder KA 320 – 9 0.5hp / 20,000rpm

### RANGE
